A Relentless Determination to Succeed

Gateway Community College Foundation

Gateway Community College

2014 Community Report

As Connecticut's largest community college, Gateway Community College influences and impacts the lives of students, the regional economy and the fabric of community life. By serving students, Gateway also responds to industry needs in New Haven County, supports local businesses, develops and extends community connections and benefits society as a whole in Connecticut.

STUDENTS

8,201 enrolled for credit
32% full-time
68% part-time
26.5 average age
6,848 seeking degree
1,047 non-degree

58% ethnic minorities
30% need basic skills
58% female
42% male
29% from New Haven
70% from 12-town region
3,055 non-credit workforce enrollment

ECONOMIC IMPACT

Impacts Created by GCC	Added Income	Jobs
Operations Spending	$56.6 Million	906
Students Spending	$11.5 Million	258
Alumni	$218.6 Million	2,606
Total Impact	**$286.6 Million**	**3,770**

Impact by Industry	Added Income (thousands)	Jobs
Health Care and Social Assistance	$35,113	671
Manufacturing	$16,712	96
Real Estate and Rental & Leasing	$14,236	58
Government, Non-Education	$11,929	105

"I'm grateful to the College for providing me with an outstanding education and a promising future. Like most 17-year-olds, I didn't know what I wanted to do with my life. All I knew is that it would require a college education. I got that and more. I got a helping hand in starting my career."

Edwin Martinez,
Gateway Community College graduate

"Gateway Community College makes the impossible possible for students with the drive, desire and determination to make something more of their lives. I have witnessed first-hand the impact not only on individual lives and families, but on the life of our community. Gateway is an essential catalyst that truly changes lives and builds futures."

John Soto,
President,
Spacecraft Manufacturing

A Relentless Determination to Succeed

Dear Friends:

The Gateway Community College Foundation and Gateway Community College are partners with purpose. Together, we are on the ground floor of the future, propelling students to accomplishments and achievements that will impact their lives and the broader community in exciting and enduring ways.

Our students possess drive and tenacity, persistence and grit - characteristics that we admire and are inspired by. They persevere past obstacles and push open doors of opportunity through insistent determination. The knowledge they acquire, working closely with talented, experienced and caring faculty, provides the foundation from which their potential can be recognized and realized.

Gateway is accessible, affordable, accredited and engaging. It is a place for new beginnings and extraordinary journeys – a comfortable and encouraging community for those seeking knowledge and a path to apply its lessons.

Students leave here and go places. You will see Gateway graduates in academia to further their education, and employed by business large and small, cutting edge and traditional, local and global in a vast array of fields and disciplines. Our alumni are everywhere, in Connecticut and well beyond.

Support for the Gateway Community College Foundation is a lifeline for Gateway Community College, enabling faculty, staff and students to pursue what would otherwise be beyond reach. The impact of that support is evident not only in the work of our students, our classrooms, labs and lectures, but in the businesses, organizations and institutions that benefit from our many graduates who remain in our region – and who, in turn, benefit all of us.

A Relentless Determination to Succeed. Those words best characterize the core of Gateway, changing lives and building futures. These pages reflect who we are, what we do, and the impact we have, as well as our profound appreciation for every individual and institution that stands with our students, supports them, and makes Gateway the remarkable place that it is today. Thank you all for making the progress possible, and for standing with us every step of the way.

Sincerely,

Dorsey L. Kendrick, Ph.D.
President
Gateway Community College

Thomas Griggs, Jr., Chair
Board of Directors
Gateway Community College Foundation

Community Connections

The Gateway Community College Foundation is an independent, 501(c)(3) not-for-profit corporation, whose sole purpose is to support Gateway Community College. There could not be a higher calling.

Through the conscientious and devoted efforts of the Foundation, students are better able to pursue their education, and faculty and staff are provided with support for initiatives that will ultimately benefit students. Gifts to the Foundation are tax-deductible to the fullest extent of the law and help ensure that Gateway Community College has the resources to remain at the forefront of higher education.

The influence and impact of Foundation investments in Gateway are evident at every turn. Funds support much-needed student scholarships, help purchase state-of-the-art classroom equipment and provide professional development for college educators and student support personnel. The Foundation's irrepressible and irreplaceable support helps to launch innovative academic programs, respond to funding gaps in others, and provide tangible encouragement to students facing nearly overwhelming challenges.

Beyond that, the Foundation helps build and nurture a network of community support and promotes better public awareness and understanding of Gateway Community College as a significant regional resource and a means of providing and promoting educational opportunity and career advancement.

The Foundation's close association with the College encourages and supports community-based internships in many fields, providing students with frontline experience and the opportunity to demonstrate their commitment to contributing in meaningful ways to the community, reflecting the character and enterprise of tomorrow's workforce.

The Gateway Community College Foundation is administered by a Board of Directors composed of community leaders representing many walks of life and career pursuits. Their voluntary efforts, and the incredible commitment of businesses, organizations and individuals throughout the region provide connections that, each and every day, are changing lives and building futures.

50th Anniversary of the New Haven Chapter of SCORE.

Annual Red Cross blood drive, among the many events held in the Curran Community Center.

"Donations to Gateway reverberate throughout our community in so many ways. Students benefit, enabling them to focus on their studies, their families benefit from the stronger job prospects that result, and we all benefit, because Gateway graduates largely stay in the New Haven region, close to home, and continue to make a difference for years to come."

Althea Marshall Brooks

Graduates of Gateway Community College's Nursing program.

Students in Gateway's Radiography program.

Nuclear Medicine Students.

Nursing & Allied Health

Gateway Community College (GCC) offers the following Associate Degree (AS) and Certificate (C) Allied Health and Nursing Programs: Diagnostic Medical Sonography (AS), Exercise Science and Wellness (AS, C), Nuclear Medicine Technology (AS, C), Nursing (AS), Nutrition (AS), Radiation Therapy (AS), and Radiography (AS). Graduates from these programs are also eligible to apply for the certifying board examinations administered by their programs' accrediting bodies.

Rapid and continual advances in technology have dramatically increased the use of sophisticated equipment in these expanding fields locally and globally, sharply increasing the demand for individuals certified in these varied Allied Health fields. Gateway's state-of-the-art healthcare simulated labs and accomplished, experienced faculty provide the foundation for the Allied Health and Nursing programs by providing tremendous opportunities for on-campus skills practice and simulated learning activities. Equally integral to the programs' rigorous curricula in preparing healthcare professionals are the community connections that provide a range of clinical experiences at a variety of institutions in the greater New Haven area as well as throughout the State of Connecticut. Some of these clinical affiliates include Yale-New Haven Hospital, Inc., Griffin Hospital, Veterans Affairs CT Healthcare, Cornell Scott Hill Health Center, St. Francis Care, Southington-Cheshire YMCA, Connecticut Valley Hospital, and MidState Medical Center. Alliances with our clinical affiliates offer students hands-on learning opportunities, and are among leading employers who provide students with opportunities upon graduation.

The combination of classroom, laboratory and clinical experiences and the firsthand knowledge they provide help to develop individuals who will excel in our community, and who will deliver competent, holistic care grounded in evidence-based practice to the residents within the State of Connecticut.

Lois Edelman explains procedure to students.

Yale New Haven Hospital Nursing Suite Ribbon Cutting Ceremony.

Science, Technology, Engineering, Math

Real world applications for a Gateway education were front and center when five engineering students took part in the Life Support and Sustainable Living Program, where people from industries and local organizations including NASA, GE, Connecticut Children's Medical Center, Hamilton Sunstrand and Pratt and Whitney propose a problem that they need to have addressed. Student teams from Connecticut colleges then set off to engineer and design a product to solve that problem.

When the contingent of students from Gateway developed a solo transfer wheelchair, an unmanned aerial vehicle (UAV) and a non-profit smartphone app, the caliber of a Gateway education – and the ingenuity of our students - was on full display. The lead-in for participation included leadership training, team building and how to deal with difficult challenges. Gateway's campus was a nexus for many of the team meetings, to take advantage of the state-of-the-art facilities, from the hi-tech classrooms to the engineering labs.

Understandably, Gateway's engineering program is a very active pipeline to jobs in the engineering field, and a solid foundation for students who choose to continue their education to a bachelor's degree and beyond.

Across the sciences, mathematics and technology fields, Gateway's strength is evident, attracting students with the aptitude to excel and the fortitude to overcome obstacles along the way. A rigorous curriculum is designed to mirror reality, as faculty – many with backgrounds in industry as well as higher education – provide guidance and instruction with eyes firmly fixed on students' futures.

Gateway's innovative and distinctive Railroad Engineering Technology program amply demonstrates that priority. As Connecticut embarks on an unprecedented transportation investment initiative that prominently features rail, Gateway is providing academic expertise for students looking to that industry for employment. Academic coursework includes pneumatics and hydraulic controls, safety in the workplace, reading and interpreting railroad diagrams, standards and practices, and electro-mechanical troubleshooting. Connecticut does not have a better academic preparation program for getting up-to-speed in the industry.

Automotive Technology

It's not your grandfather's automotive industry – not even close. That is why today's automotive technology program at Gateway provides a rigorous academic curriculum preparing students to be job-ready, with the know-how to excel and advance in the field.

Academic success requires a high degree of technical savvy and solid grounding in scientific methodology, critical thinking and analysis, mathematics and language arts – as well as knowledge of computer applications and a range of technical software. Gateway's community connections support students in the development of hands-on skills – from general engine diagnosis to proficiently performing general maintenance and specific component repairs – along with workplace skills such as maintaining a safe and healthy work environment and applying professional ethics.

Automotive students have the unique opportunity to develop their skills through participation in the General Motors Automotive Service Education Program (ASEP). This unique, cooperative initiative prepares students for a challenging career in a General Motors or AC Delco sponsored automotive repair facility. Students attend classes and labs at the North Haven Campus, receiving state-of-the-art instruction on current General Motors' products, and work full-time at a sponsoring GM or AC Delco shop. GM provides Gateway with diagnostic equipment, educational materials, shop equipment and vehicles for students to work on. Donated vehicles include new Cadillacs, Buicks, GMCs and Chevys including a high-tech 2014 Corvette Stingray. This education/industry partnership helps Gateway students launch rewarding careers while meeting the staffing needs of local industry.

Automotive students performing vehicle inspections.

GM ASEP students practicing their diagnostic skills.

Culinary Arts

Internships and work experience sites are required for students as a central aspect of Gateway's highly regarded all-encompassing Culinary Arts and Food Service Management programs, where every aspect of their education is scrutinized. From maneuvering in a commercial kitchen and event-sized dining room to cleaning and sanitizing equipment and materials, becoming conversant in food preparation theories and techniques to learning local Board of Health protocols and transporting food and equipment properly, there is more – much more – to culinary arts and food service management than the food that arrives at the table. (However appetizing and delectable it may be.)

Students obtain a well-rounded education in certificate or associate degree programs, characterized by both laboratory and classroom experience. Professional Baker and Culinary Arts certificates are among the program offerings.

Beyond the wide-ranging academic course work, students prepare and serve a wide variety of meals in the dining room at the downtown campus (Café Vincenzo) to staff, faculty, and the public. The essential hands-on experience provides the framework, background and agility to launch a successful career, and the confidence to join or develop a business in one of the fastest growing fields in the nation.

Business/Accounting/Entrepreneurship/Computer Science

Developing a business strategy.

Students perform steps in algorithm.

The business disciplines at Gateway provide students with the solid foundation they will need to succeed in an intertwined and interdependent world, where business opportunities can be close to home or on different continents and often require newly-minted professionals to travel through unchartered waters.

Academic coursework led by expert faculty, along with experiential education across the region, permits students to pursue their education in a range of business disciplines, including Business Administration, Business Office Technology, Computer Science, Entrepreneurial Studies, Retail Management and Customer Service Technology. Specialized Associate Degrees and Certificate programs – in fields such as Accounting, Marketing, Hotel-Motel Management, Hospitality Management, and Electronic Health Records - are among the academic programs.

The Small Business Center at Gateway includes the New Haven Chapter of SCORE and provides opportunities for sponsorships, partnerships and affiliations for programs and client services with the Small Business Administration (SBA), Connecticut Procurement Technical Assistance, the Connecticut Small Business Development Center, U.S. Department of Commerce Middletown Export Assistance Center, Hartford Entrepreneurial Center, Women's Business Center and Connect Veterans, Inc. There are a great many organizations and agencies that have well-established connections to Gateway, and our students.

Looking to advance the next generation of entrepreneurs, Gateway Community College hosted the highly regarded Start-Up Weekend, bringing together individuals with their sights clearly set on launching a business that could thrive into the future.

"Gateway was and always will be the gateway to my success. I grew up in the inner city of New Haven. The likelihood of me going to college was very slim. Gateway helped me to start my business because at Gateway, I learned how to run an office. I took Outreach Realty from my basement to an empire."

Roberta Hoskie, President, Outreach Realty Services and Outreach School of Real Estate

Esther Haseltine Schiavone Cultural Fund

The Esther Haseltine Schiavone Cultural Fund, established in 2006 through the Gateway Community College Foundation by Schiavone's daughter, Jennifer Schiavone, was set up in her mother's memory to help the arts programs at GCC. Students benefit each year from the endowment, being able to participate in distinctive programs that wouldn't otherwise be part of their Gateway experience.

Understanding the humanities contributes to developing well-rounded individuals with the knowledge, understanding and awareness to succeed in the workforce and in life. At Gateway, the diversity of disciplines that are available – and programs such as those supported by the Schiavone Cultural Fund – make the connection between humanities subjects and a successful career very real.

The humanities field incorporates courses such as history, literature, art, music, design, language and philosophy - all related to the human experience. They offer ways and means to navigate in everyday life as people of differing backgrounds, cultures and perspectives are encountered. Stressing excellent written and oral communication skills, for example, provides the foundation for a bright future.

"Gateway has changed the lives of students above and beyond the curriculum, with the help of exceptional programs enabled by the Schiavone Fund. We are able to add texture and dimension to students Gateway experience, in ways that will endure. In doing so we also strengthen job prospects in surprising ways. Potential employers notice immediately, just as students do."

Jennifer Schiavone with nieces Josie and Allyx Schiavone.

High School Connections

Gateway Community College helps students prepare for college even before they arrive, offering a jumpstart on a college education. The Gateway Middle College program has at its core an effective high school-college partnership, clearly focused on preparing students to successfully tackle college-level work.

The essential pillars of Gateway Middle College, reflecting a growing national trend, are a dynamic partnership between high school and college faculty and staff, data driven decision making, collaborative professional development and college readiness in teaching and learning, including literacy, numeracy, college knowledge and student support.

Participation in Gateway Middle College affords students the opportunity to take courses for college credit, tuition free. In the upper grades, Gateway will provide an "open campus," in addition to the traditional setting of courses offered at the college's campus. This allows students total access to academic support facilities, such as the library, computer labs, and a range of student services.

Gateway has effective and ongoing Middle College partnerships with James Hillhouse High School, New Haven Academy and Co-Op High School in New Haven. Courses offered as part of the Middle College Program include:

- Introduction to Criminal Justice
- General Psychology I
- African American History
- American Government
- Web Design
- Introduction to Business

The G.R.E.A.T. Center

At Gateway, we mean business.

The G.R.E.A.T. Center, Gateway's Resource Education And Training Center, offers fast-paced training in high-growth occupations and builds customized programs to suit the scheduling, budget and professional development needs of local business. It is an initiative on the frontlines, at the intersection of business necessities and student aspirations.

Courses have included allied health, precision manufacturing, green technologies, digital applications, and financial services. Programs are generally non-credit, and are typically tied to industry-recognized credentials. Program elements include internships, apprenticeships and job shadowing, and are under the guidance and instruction of expert lecturers.

The GREAT Center reflects Gateway's commitment to the community, demonstrating the agility and responsiveness to meet business demands with fast-paced, high-impact training that delivers well-prepared and engaged prospective employees.

Gateway Community College President Dorsey Kendrick sums it up:

"It is our response to the needs of the employers, but it is also an excellent way to get these students into career pathways where they can continue to grow and learn and make good lives for their families."

It is a win-win – in fact, a GREAT win.

"Gateway gave me confidence in myself. They really care about you and take the time to make sure you are prepared for the working world. Gateway is a great school and a good opportunity to make a new beginning. I am so glad I chose Gateway for my path into the future."

Pauline Dorsi, Gateway Community College graduate

Community Coming Together

As part of its mission to serve the community, Gateway Community College utilizes its facilities not only to serve the educational interests of its students, but also to assist community organizations seeking venues for various events and programs. The community comes together at Gateway, in a myriad of ways.

At the heart of these occasions are committed members of the community and the organizations they represent, as well as outstanding staff members at Gateway whose dedication in planning, preparing, and organizing the events assures that all goes smoothly and every detail is accounted for. Their diligence is indispensable and reflects well on Gateway, regularly earning kudos from participants.

Recognizing the resource needs of Gateway students, the Foundation pursues efforts to provide academic scholarships to assist students, as well as to provide professional development for faculty and staff, and to bring cutting edge equipment and educational material into classrooms and labs. The Gateway Community College Foundation reaches out to businesses, agencies, organizations and individuals throughout the Greater New Haven community.

Popular and well-attended events bring enthusiastic supporters together in fellowship and celebration, raise public awareness of Gateway's achievements, and recognize supporters for their numerous contributions – of time, talent and treasure. When the community comes together to support Gateway students, we all benefit.

Dan Caron of Alexion Pharmaceutical, which underwrites bus passes for Gateway students.

Student receives recognition at Gateway ceremony.

Hall of Fame

The annual Hall of Fame Induction and Reception is the year's hallmark event. Since 1997, proceeds have served as Gateway's main source of scholarship funds, distributed to help students prepare for and launch promising careers in today's workforce. Thanks to the financial support of generous sponsors, the patronage of attendees, and the help of enthusiastic and dedicated volunteers, the Hall of Fame Induction and Reception continues to flourish.

Each year, the GCC Foundation honors exceptional corporate individuals, community leaders and Gateway alumni for their profound commitment to, and support of, the College's dynamic educational mission. The signature event brings the community together, reaffirming Gateway's unique role and looking ahead to the influence and impact that each succeeding class of graduates will have on their individual and collective futures, and ours.

Hall Of Fame inductees.

Sharon Burns, Michael Twitty and guests.

Senator Blumenthal with Gladys and John Soto.

Gateway Community College's Neighbors in Need dinner is wonderful and meaningful. Largely funded by the college community through donations and fundraisers, it brings together a supportive community. Among the many contributions are transportation donated by Dattco, groceries donated by Claire's and Elm City Market, and additional efforts led by the New Haven Town Green District and Easter Seals - Goodwill. It is a community effort of the first order, accompanied by the dedicated efforts of Gateway's faculty and staff.

A thoughtful community initiative that began nearly two decades ago, the gathering of homeless and others in need of a good meal and festivities as the holiday season approaches has grown to become the area's largest event of its kind.

Children received toys and enjoyed face painting and music; every adult received a gift bag of personal-care items, and all guests were presented with a Goodwill store gift card.

Through the years, hundreds of individuals have participated, enjoying every moment of the generosity and genuine good will shared among volunteers and participants alike. Community – in every sense of the word.

C.O.O.K. Series

When it comes to watching gourmet chefs whip up mouth-watering cuisine, everyone wants a front-row seat, everyone wants to ask questions, and everyone wants to taste the delicious food those chefs prepare with such style and panache! That's the premise behind Gateway Community College Foundation's innovative "Chefs of Our Kitchen" (C.O.O.K.), an annual series of intimate presentations by well-known food authorities from Greater New Haven, as well as some renowned regional, national and international culinary experts.

Sponsors of the C.O.O.K. series include some of Greater New Haven's leading companies, businesspeople and civic leaders. Proceeds from each event help support Gateway students, faculty and staff.

The C.O.O.K. series takes place in Café Vincenzo, Gateway's cozy, elegantly appointed demonstration kitchen and dining room. Presenting chefs show how their signature dishes are prepared, cooked, garnished and served. Guests see remarkable culinary tools being brandished by highly trained experts, and learn how to use commonplace and exotic ingredients and spices in their home kitchens.

A pre-event meet-and-greet reception, featuring an abundant selection of gourmet hors d'oeuvres, usually includes a book-signing that allows guests to chat with each C.O.O.K. personally. This is followed by a delicious multicourse sit-down dinner, usually prepared by Gateway's Culinary Arts students under the expert direction of the celebrity C.O.O.K. The popular series provides an opportunity for Gateway to showcase students in the midst of a nourishing, tasty and entertaining evening, as the community comes together at Gateway.

Ways to Give

Bill Curran & his daughters Margie Andreassi & Jean Sosnaud.

"There is nothing more rewarding in life than giving students a real opportunity to demonstrate how far they can go. Gateway's students are tremendously deserving of that chance, and their hard work and achievement is inspiring. I am grateful that Gateway provides excellent ways to make a difference."
Bill Curran

Students at Gateway Community College possess a relentless determination to succeed. If there is a gap to be bridged, it is often in the financial resources required to pursue their education. That is why contributions that directly support students - through scholarships and other opportunities - are indispensable, and often life-changing.

The Gateway Community College Foundation is an independent, 501(c)(3) not-for-profit corporation administered by a Board of Directors composed of community leaders representing many walks of life. Gifts are tax-deductible to the fullest extent of the law and help ensure that Gateway Community College, Connecticut's largest community college, can continue to be at the forefront of higher education. The benefits accrue not only to students and their families, but to the entire community.

Ways to give include supporting students where they learn through the Annual Fund, establishing an enduring gift of education through an endowment fund, and assuring impact that lasts a lifetime through an individualized planned giving program. Critical support can also be contributed by supporting specifically designated academic programs, technology and equipment, or by extending students' opportunities through participation in one of numerous scholarships that often are the difference between moving ahead with higher education and the end of a dream of college education for current or prospective students.

The Helping Hands Fund, which assists students who are experiencing a short-term financial crisis for which they could not have been prepared, and for which no other resources are immediately available to the student, is also supported by generous donations from members of the community and provide a tangible lifeline to students at particularly tenuous and pivotal moments in their lives.

To learn more about Ways to Give, contact 203-285-2296.

Thank You

The enduring impact of the Gateway Community College Foundation is intertwined through every aspect of Gateway Community College. Contributions support the acute needs of the college, advancing its academic mission and vigorous attention to student success, by funding scholarships, faculty and staff development, instructional program development, technology and equipment. Across a range of academic disciplines, the caliber of programs and initiatives are strengthened and improved by Foundation donors, whose generosity supports students' relentless determination to succeed.

The Gateway Community College Foundation celebrated Gateway's scholarship recipients and the generous donors who support the program at a rousing mid-year luncheon that brought recipients and donors together. More than $100,000 in scholarships was made available to Gateway students – the largest amount awarded since the Foundation's establishment in 1993. The GCC Foundation awarded a total of 137 scholarships, ranging from $250 to $2,000.

Gateway Community College Foundation

The Gateway Community College Foundation Board of Directors are notable and dedicated leaders who share a passion for the mission and students of Gateway Community College.

Through their exceptional voluntary service, students are supported as they strive to realize their potential and achieve their dreams, advancing toward a more rewarding career and an improved life for their families.

The effects extend even further, to a more vibrant and connected community. It begins with caring and commitment, which every member of the Board of Directors exemplifies with distinction.

"I came to believe it was cool to be back in school. Everyone was down to earth, and I loved the person getting an education was allowing me to become."

GATEWAY COMMUNITY COLLEGE FOUNDATION

YOUR COLLEGE. YOUR FUTURE.

The 2014 Community Report is made possible with generous support from Webster Bank. We are enormously grateful for their commitment to our students and Gateway Community College.

Webster Bank
